# 970cse manual

Shop with confidence. Archived from groups comp.sys.hp.hardware If I send a document to the printer to print, it will print all colors except black. Here what I have tried I have changed the ink cartridge twice. I ran the printer through several cleaning cycles. I have tried the manual priming thing. I have cleaned the contacts with distilled water and the cotton ear swabs. I have updated the driver. Ive also tried the hardware reset, where you remove the USB cable and the ink cartridges, and then removed the power cable for two minutes. A friend suggested that the PCB may have gone defective. And since the PCB costs more than replacing the entire printer, that is not an option. I hate it because I REALLY like this printer. Any more ideas would be GREATLY appreciated. Archived from groups comp.sys.hp.hardware Hi there, Have you checked your printer settings in the properties and toolbox I have a 970cxi which I think is very similar and in the print toolbox in the configuration tab theres a configure print cartridges there, but mine is greyed out. Canon scanner lide 100. If yours isnt greyed out, it may be possible its set not to use the black cartridge. Or there may be another place where this setting may be enabled. Sometimes uninstalling a driver and reinstalling it wont reset the settings as they may be held somewhere in a file or in the registry and that isnt being deleted when you uninstall the driver and software. Does this happen in all applications. It could also be a shared printing preference in your applications, but I couldnt see an option for my printer that would cause that. If you cant find a setting that changes this, and if you have access to another computer, it may be worth hooking it up and seeing if it still does it or not, and if it does, then its the printer, if not, its the software and or drivers. Archived from groups comp.sys.hp.hardware Hi Mike What follows is the internal test for the 900 series printers.
